FBH80010

GROXX | FULL BODY HARNESS (SINGLE POINT)

OVERVIEW

The Groxx FBH80010 is an essential, high-durability full-body harness designed for fundamental fall protection. Engineered for simplicity and safety, it provides a secure connection for workers at height while ensuring ease of use through intuitive design features and a universal fit.

KEY FEATURES

- **Dorsal Fall Arrest**: Features a single, high-strength Forged Steel D-Ring positioned on the back, specifically designed to arrest falls safely by distributing forces across the body.
- **Dual-Tone Color Scheme**: The shoulder and thigh straps are color-coded (dual-tone) to help users quickly differentiate the top from the bottom, significantly reducing donning time and preventing incorrect fitting.
- **Customizable Fit**: Equipped with three adjustment points —including adjustable thigh straps and a repositionable chest strap—to ensure the harness fits various body shapes securely.
- **Extended Comfort**: Incorporates an ideally positioned sit-strap, which enhances ergonomic support and comfort during prolonged use or in the event of a suspension.

TECHNICAL SNAPSHOT

PARAMETER	FBH80010
Webbing Material	45mm High-Tenacity Polyester
EN requirement	Static 15 kN at fall-arrest attachment points; dynamic drop test with 100 kg mass
D-Ring Material	Forged Steel
Buckle Material	Stamped Steel
Maximum Rated Load	100 kg (User + Equipment)
Sizing	Universal

USE & INSPECTION

Install to the Groxx instructions by trained installers. Inspect before each use and at least every 12 months by a competent person.

STANDARDS

EN 361

> The AL80010 is the "workhorse" of the Groxx harness range. It focuses on the critical requirements of safety: strength, adjustability, and visibility.
