GGCWA027

OVERHEAD COUNTERWEIGHT ANCHOR

OVERVIEW

Counterweight Anchor is a robust, non-penetrating anchorage solution designed for flat roof applications where structural fixing is not possible. Engineered to provide secure and stable fall protection, it serves as a reliable anchor point for temporary work-at-height operations.

KEY FEATURES

- The Counterweight Anchor has been designed to be used as an anchor post where it's not possible to install posts on flat roof surfaces or the supporting structure below.
- In-Built shock absorbing post to reduce the impact to user and structure.
- The anchor device is supplied with four rubber coated base weights to provide better grip on the roof.
- They must be in contact with the roof surface when it is fully assembled

TECHNICAL SNAPSHOT

Detailed dimensions and load ratings for this item are provided with the quotation. Contact Groxx at **inquire@groxxgears.com** or scan the code below.

USE & INSPECTION

Install to the Groxx instructions by trained installers. Inspect before each use and at least every 12 months by a competent person.
