GGRBB038

ROUND BAR BRACKET

OVERVIEW

The Round Bar Bracket is designed to provide a secure mounting point on round structural bars or pipes for fall protection systems. It clamps firmly onto the round bar structure, allowing the installation of anchorage devices or lifeline components used during work at height. Its durable construction ensures reliable support in demanding industrial environments such as roofs, towers, platforms, and steel structures.

KEY FEATURES

- Suitable for roofs, overhead cranes, power towers, platforms, and similar structures
- Designed for installation on round bars or pipe structures
- Provides a secure mounting bracket for fall protection systems
- Clamp-type installation for stable attachment

TECHNICAL SNAPSHOT

Detailed dimensions and load ratings for this item are provided with the quotation. Contact Groxx at **inquire@groxxgears.com** or scan the code below.

USE & INSPECTION

Install to the Groxx instructions by trained installers. Inspect before each use and at least every 12 months by a competent person.

STANDARDS

EN 795:2012 Type A | CEN/TS 16415

Designed to EN 795:2012 Type A, CEN/TS 16415. Test certificate on request.
