GGVRC044

VRC ANCHOR

OVERVIEW

The VRC Anchor is a versatile fixed anchorage point designed for installation on steel, concrete, and wood structures. It features a pre-fabricated M16 thread, allowing compatibility with multiple fixing methods such as expansion bolts, chemical anchors, or welding. The anchor can also be easily integrated with other anchorline attachment systems.

KEY FEATURES

- The VRC Anchor is made of 316 stainless steel with a metallic gray finish.
- The inner diameter measures Ø48 mm.
- The anchor is rated for up to two users.
- The service life is up to 20 years under specified conditions.
