

FIXED BEAM ANCHOR

Fixed Beam Anchor ensures your safety at all times and over any distance on roofs, vehicles, towers, platforms, and similar structures. By using these anchoring devices together with the shuttle, the shuttle can move smoothly over intermediate brackets without obstruction. It enables safe attachment for fall protection equipment. It is very easy to use, suitable for harsh environments, and features a high-quality appearance.

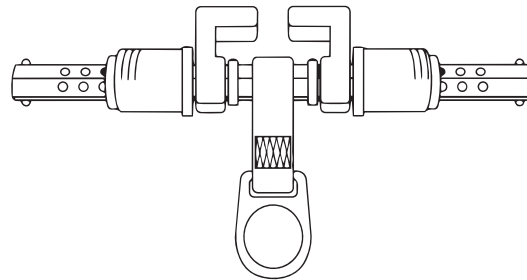

FEATURES

- Designed for temporary lifeline systems only
- Single-user anchorage point
- Suitable for roofs, vehicles, towers, platforms, and similar structures

MATERIAL

- V4A Stainless Steel

DIN EN795:2012,
C & CEN/TS16415:2013

USED IN INDUSTRY
