

# LINEAR BRACKET

GGLB054

## TECHNICAL SPECIFICATION

Unit: mm

The ring bracket, a key component of the lifeline system, delivers stable and dependable support. Made entirely of stainless steel, it provides excellent durability and load-bearing capacity. Its robust, well-engineered design ensures maximum stability and reliability. Quick and easy to install, the bracket can be flexibly configured to suit specific operational requirements, making it ideal for a variety of high-altitude work scenarios.

- The product features a compact structure, high strength, excellent rigidity, and a reliable connection. The external overhead mounting base positions the middle bracket at the same horizontal level as the steel cable, with a slight incline to facilitate smooth shuttle movement. The stainless steel plate is cut and bent as a single piece, eliminating welding and avoiding stress concentration at weld seams.
- Align the middle bracket with the steel cable on the same horizontal plane. A slight inclination helps ensure the shuttle moves smoothly.

Model	NO.	Product Material Stainless	
GGLB054	A2: 2507250006 A2: 2509170004/A4:2509230007	Stainless Steel 304/316	
Product Colour	Product Weight	Loading Capacity	Rated Load
Metallic Silver	111g 109g	2 people	23KN
Product Category	Product Category	Applicable Cable	Connection Method
Type C	62*22*70mm	φ8mm	Bolt Fastening
Combination Standard	Product Components		
EN EN795:2012, Type C CEN/TS16415:2013, Type C	Middle Bracket, Round Tube		
Product Feature	Adjustment Method	Product Warranty Period	
Intermediate Support	Fixed angle	Single-Lifeline System (Horizontal)	
Product Warranty Period	Maintenance Cycle	Product Validity Period	
1 Year	Depending on frequency and conditions of use, a safety inspection is advised within one(1) year.	304 / 10 Years(Conditional) 316 / 20 Years(Conditional)	
List of Accessories			
Stamped bracket round tube - A2*1, flat round head semi-hollow rivet M8*25mm - A2*1, stamped middle bracket *1 - L-shaped connecting plate *1, stamped middle bracket *1, round head M8*16 Allen screw - A2 *1, M8 nylon lock nut - A2 *1, washer 8*14*1*1
