

RING ANCHOR

Ring Anchor ensures continuous safety at any time and over any distance when working on roofs, cranes, power towers, platforms, and similar structures. Used together with compatible anchorage devices and shuttle systems, it allows smooth and unobstructed passage over intermediate supports. In most applications, this system provides uninterrupted fall protection throughout the entire work process, enabling users to continue working safely and efficiently. It is easy to use, suitable for harsh environments, and features a high-quality finish.

FEATURES

- Up to 1 user only
- Roofs, cranes, power towers, platforms, and similar structures
- Unobstructed continuous pass system

MATERIAL

- V4A Stainless Steel

CE DIN EN795:2012, Type C
& CEN/TS 16415:2013

USED IN INDUSTRY
