

SIDE ACCESS LATERAL ANCHOR

GGSLA058

GROXX

TECHNICAL SPECIFICATION

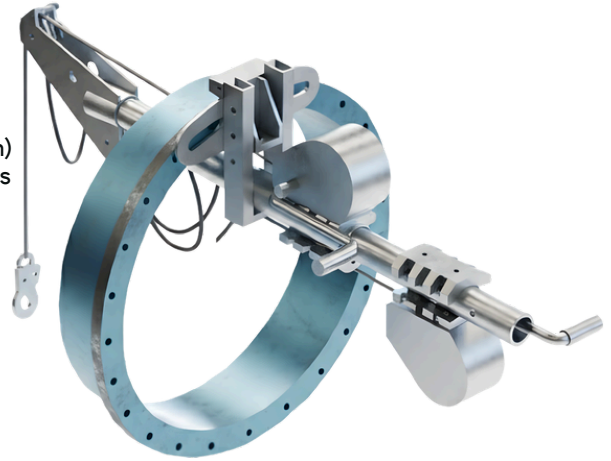

The Side Access Lateral Anchor provides a secure anchorage solution for work at height where side access is required, such as on roofs, platforms, towers, and steel structures. It is designed to ensure reliable fall protection while allowing safe and controlled lateral movement during operations. When integrated with compatible fall arrest systems, it enables continuous protection throughout the working process, allowing users to carry out tasks efficiently without interruption. The system is easy to install, suitable for demanding environments, and built with a durable, high-quality finish.

FEATURES

- Maximum Users are up to 4 users simultaneously (depending on configuration)
- Roofs, platforms, towers, overhead structures, and similar elevated work areas
- Reliable lateral anchorage for continuous fall protection

MATERIAL

- V4A Stainless Steel

CE EN 795:2012 Type C
