

VRC ANCHOR

The VRC Anchor is a versatile fixed anchorage point designed for installation on steel, concrete, and wood structures. It features a pre-fabricated M16 thread, allowing compatibility with multiple fixing methods such as expansion bolts, chemical anchors, or welding. The anchor can also be easily integrated with other anchorline attachment systems. Its anti-loosening flange design ensures secure fastening and long-term stability across various applications.

FEATURES

- The VRC Anchor is made of 316 stainless steel with a metallic gray finish.
- The inner diameter measures Ø48 mm.
- The anchor is rated for up to two users.
- The service life is up to 20 years under specified conditions.
- The product comes with a 1-year warranty.

INSTALLATION

- Bolted installation (including chemical anchors, expansion bolts, and standard bolts)
- Welded installation

MATERIAL

- Material: 316 Stainless Steel
- Finish: Metallic Gray

WEIGHT

- 366 g

STRENGTH

- The maximum load capacity is 32 kN.
